

EXAMPLE PERMITTING WORKFLOW

with Modern Automation Platforms

STEP 01

Access the Online Form

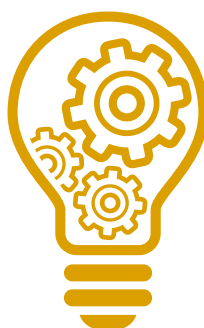

Project details, documents, and payments can be collected online. Automatic checks verify required documents are submitted

STEP 02

Workflows Begin

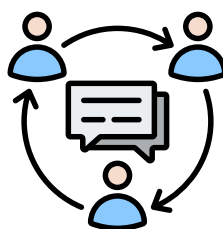

Staff is automatically notified at each step of review. Integration with GIS, scheduling systems, building codes, and mobile apps speeds the process.

STEP 03

Proactive Communication

Applicants are notified about updates automatically. Staff also can easily reach out to obtain more information, as needed.

STEP 04

Visibility and Reporting

A configurable dashboard provides managers real-time visibility. Having information in one place means detailed reports are fast and easy, too.
